

Male Anatomy

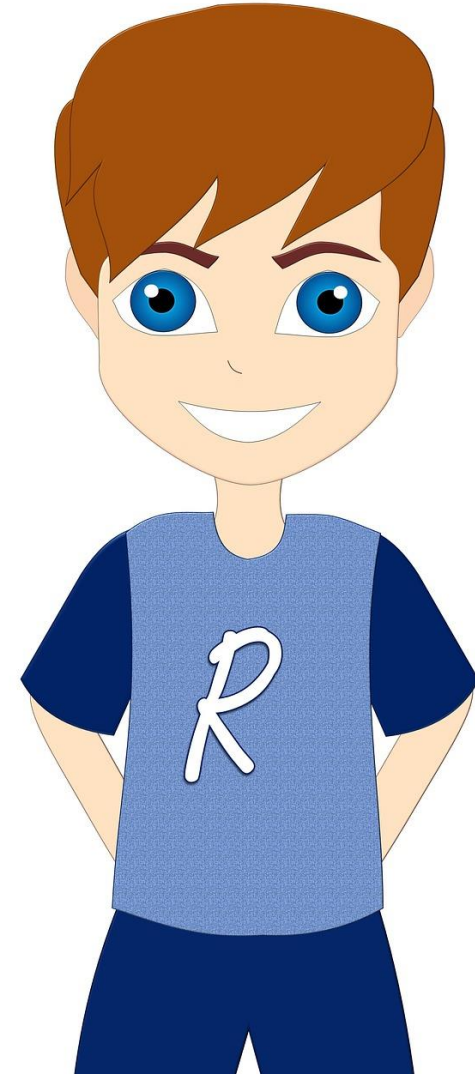

Essential Question

What are the parts of the male anatomy?

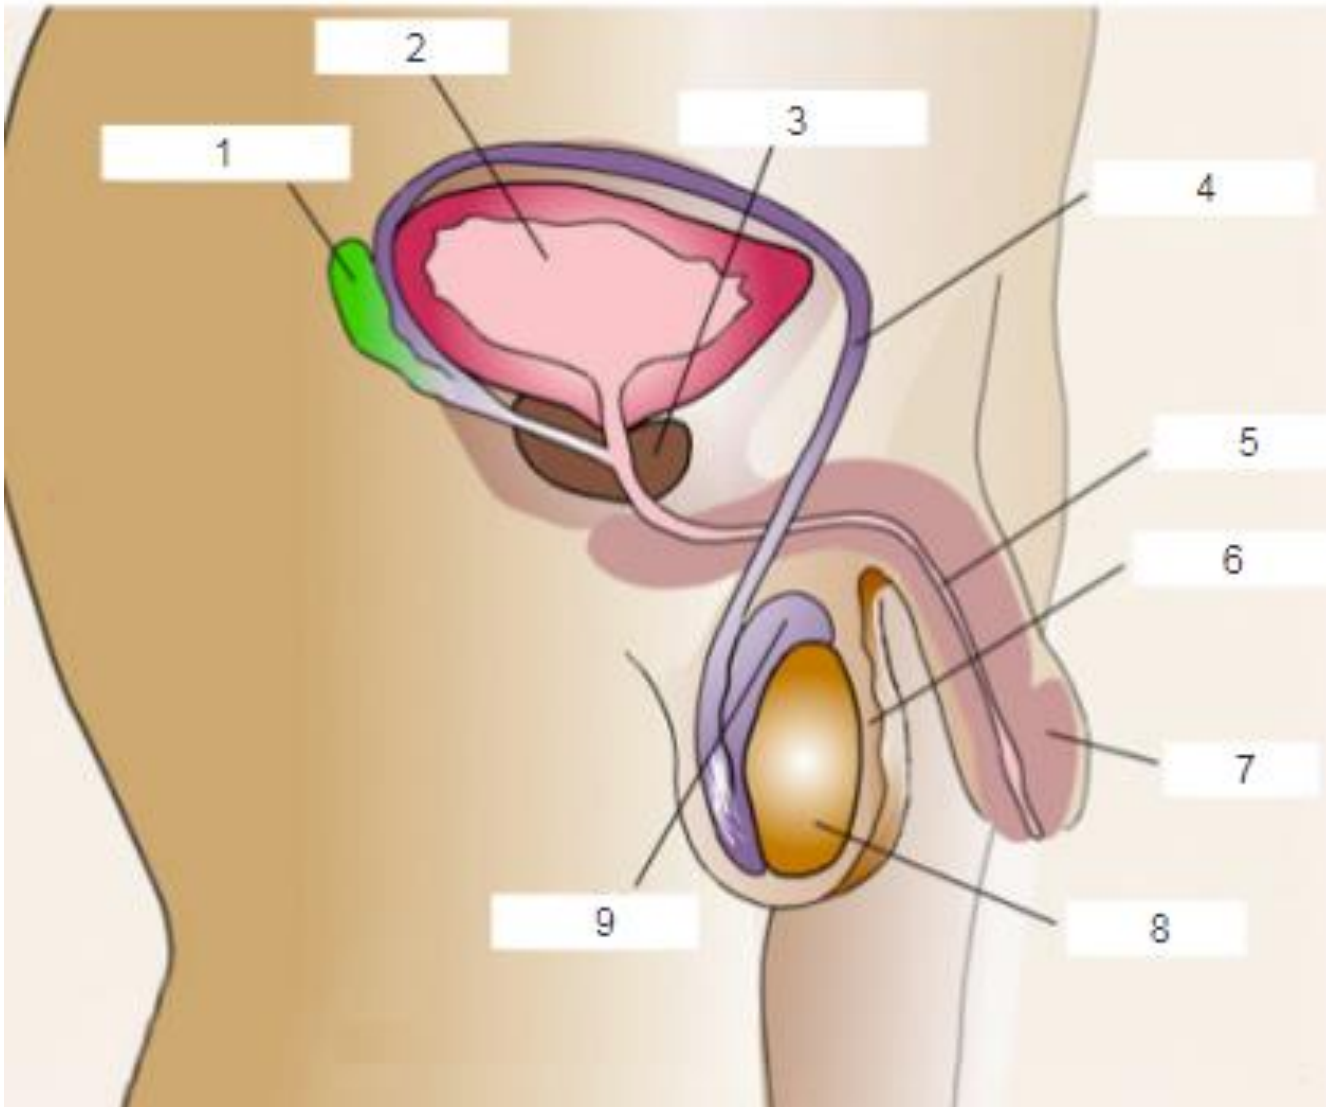

**SWBAT: Identify
parts of the male
anatomy.**

What are some body systems you have learned about?

1. **Seminal vesicles**- secrete a thick fluid that nourishes the sperm.
2. **Bladder**-an organ that stores urine.
3. **Prostate gland**-produces fluid that makes semen.
4. **Vas deferens**-carry sperm to where it mixes with semen before it leaves the body.
5. **Urethra**-takes urine from the bladder out of the body.
6. **Scrotum**-contains two testicles.
7. **Penis**-an organ in which urine and sperm-filled semen leave the body.
8. **Testicles**-makes testosterone and sperm. There are two of me.
9. **Epididymis**-a duct behind the testis, which sperm passes to the vas deferens.

1. Seminal Vesicle

2. Bladder

3. Prostate Gland

4. Vas Deferens
